## **2017-18 NCAA Rifle Rules Modifications**

Updated: July 31, 2017

The following modifications have been approved by the NCAA Men's and Women's Rifle Committee. **All NCAA Smallbore Rifle and Air Rifle competitions shall be governed by USA Shooting rules and regulations unless modified by this document.**

USA Shooting Rules – Edition 2017, Effective date January 1, 2017 shall be used for the entire NCAA rifle season, including the championships.

Please note:

- any reference in the USA Shooting Rules to 50 m rifle shall be applied to 50 foot rifle for NCAA purposes.

“Counter” or “Counted” shall refer to student-athletes whose performance is designated to count towards the calculation of their teams score for a match (maximum of five counters).

“Non-Counter” or “Non-Counted” shall refer to student-athlete(s) who compete at a match but are not designated to have their performance count towards the calculation of their team score for a match.

“Squadded” shall refer to the assignment or placement of a student-athlete at/in a particular firing point, target, relay, etc.

1. NCAA Intercollegiate competition shall be conducted on an indoor range.
2. **Contests.** As prescribed by Bylaws 17.02.3 and 17.02.4, a countable contest for a member institution or an individual student-athlete representing a member institution is any contest by that institution against an outside team in that sport, unless otherwise exempted in Bylaw 17. A team countable rifle contest (“match”) consists of a minimum four “counter” (i.e., one of the countable scores for team competition) team members in shoulder-to-shoulder competition between two intercollegiate institutions.

During the regular season “non-counter” (i.e., not one of the countable scores for team competition) team members are exempt from the shoulder-to-shoulder requirement.

For matches shot during the NCAA Qualifier weekend all scores entered into the score reporting system will be used for selection to the NCAA Championships and must be shot shoulder-to-shoulder. See section 3,b below.

3. **Standard Match Format.** The standard match format shall consist of the USA Shooting 60-shot 3x20 small bore and 60-shot air rifle with no more than one hour between disciplines. If possible, the order of each relay shall be small bore first, followed by air rifle.

The intent of this rule modification is for teams to compete in true, shoulder-to-shoulder matches. Exceptions are permissible to accommodate range space, but match organizers will strive to maintain

the integrity of shoulder-to-shoulder competition, ensuring equal representation/participation from both or multiple teams at all phases of the match.

a. **Regular Season Matches** Every attempt should be made to comply with the standard match format and the following guidelines:

- (1) "Counter" student-athletes should be squadded equally among all teams participating on each relay.
  - (a) 3 teams can be (abc / abc) or (ab / ac)
  - (b) 4 teams (abcd / abcd or ab / cd)
- (2) "Non-counter" student-athletes can shoot any time on any point available, provided "counter" student-athletes are sufficiently represented on each relay.
- (3) Disciplines (SB/AR) may be shot in any order and individuals can shoot SB/AR in any order, counter or non-counter. See section 3,a,(5) below
- (4) Multi-day matches may follow the NCAA Championships format of SB on Day 1, AR on Day 2.
- (5) Any deviation from the Standard Match Format shall be agreed upon in writing by the head coaches of each institution participating at least one week prior to the scheduled start of the match.
- (6) Ranges under ten points total, or permanently split ranges under ten points for each gun, are exempt from the Standard Match Format rules for regular season matches.

b. **NCAA Qualifier Matches** All designated NCAA Qualifier matches shall use the standard match format. Additionally, the following protocols will be required for all NCAA Qualifier matches:

The range facility and the number of firing points used for the NCAA qualifier shall be divided equally for the institutions that are participating. If two teams are competing, the number of firing points shall be divided equally 50%-50% (i.e. Range has a total of 12 firing points, each institution shall be designated 6 points per team). If more than two teams are participating, then each team would have an equal number of firing points per relay (i.e. Range has a total of 12 firing points and three teams competing, each team would have 4 points per team).

- (1) The host institution retains the discretion to allocate more firing points to the visiting institution if the facility has additional firing points and a sufficient representation of "counter" student-athletes are squadded on each relay.
- (2) "Counter" student-athletes will compete prior to "non-counter" student-athletes. If more than one relay is required to complete the contest, each relay shall have "counter" student-athletes from each institution competing shoulder-to-shoulder in each relay. Exception: If the match requires more than one relay for "counter" student-athletes to compete shoulder-to-shoulder, "non-counter" student-athletes may use firing points not being used in a relay.

#### 4. **Teams.**

a. For regular season contests, including the NCAA Qualifier, teams may be composed of a minimum of four but not more than five shooters per discipline.

- b. For the NCAA championships, teams shall be composed of a minimum of four but not more than five shooters who shall shoot both smallbore and air rifle.
  - c. Team members shall be designated before any team member starts firing in that discipline.
5. **NCAA Approved Electronic Targets.** For Air Rifle (10 meter) and Smallbore (50 feet), all NCAA competitions using electronic scoring targets shall comply with USA Shooting Rule 6.3.2 and shall at a minimum be ISSF Phase I approved.
6. **Equipment.**
  - The maximum weight for a complete smallbore rifle is eight kilograms.
7. **Injury.** In case of an injury to a competitor during a competition, a medical evaluation shall be conducted by a designated medical professional (i.e., doctor or athletic-trainer) and he/she shall make a decision of continued participation or medical disqualification. If, in the opinion of the medical professional, continued participation by the injured student-athlete may expose the student-athlete or others to a significantly enhanced risk of harm, the medical professional has the final decision regarding participation by the student-athlete. If an injured or ill student-athlete receives a medical disqualification, he/she shall not be allowed to compete for the rest of the contest. If the injured/ill student-athlete was one of the five "counter" student-athletes (for scoring purposes) the scores for the four remaining "counter" student-athletes from the team members will be added to establish the team score.
8. **Ties.**
  - a. For individual ties, see USA Shooting Rules 6.15.
  - b. For discipline team events (i.e., smallbore or air rifle), ties shall be decided by the center count of the four "counter" student-athletes making up the counting score. If a tie remains, the score of the fifth "counter" student-athlete score shall break the tie. If the tie is still not broken, the center count of the fifth "counter" student-athletes shall break the tie. If tie still remains the tie shall be broken by counting back the combined score in each ten shot series from your four counting scores beginning with the last series.
  - c. For aggregate team scores, ties shall be first decided by the center count of the eight counting team scores. If a tie remains, the score of the fifth "counter" student-athletes from both disciplines shall break the tie. If the tie is still not broken, the center count of the fifth "counter" student-athletes from both disciplines shall break the tie. If tie still remains the tie shall be broken by counting back the combined score in each ten shot series from your eight counting scores beginning with the last series.
9. **Disabled Student-Athletes.** The NCAA encourages participation by student-athletes with disabilities (physical or mental) in intercollegiate athletics and physical activities to the full extent of their interests and abilities.

An NCAA member institution will have the right to seek, on behalf of any student-athlete with a disability participating on the member's team, a reasonable modification or accommodation of a playing rule, provided that the modification or accommodation would not:

- a. Compromise the safety of, or increase the risk of injury to, any other student-athlete.
- b. Change an essential element that would fundamentally alter the nature of the game; or
- c. Provide the student-athlete an unfair advantage over the other competitors.

To request any such modification or accommodation, the member's director of athletics, or his/her designee, must submit a rule waiver request, in writing, to the secretary-rules editor. Such written request should describe:

- a. The playing rule from which relief is sought;
- b. The nature of the proposed modification or accommodation;
- c. The nature of the student-athlete's disability and basis for modification or accommodations;  
and
- d. The proposed duration of the requested modification or accommodation.

Additionally, each request should be accompanied by documentation evidencing the student-athlete's disability (e.g., a medical professional's letter). Upon receipt of a complete waiver request, the secretary-rules editor will consult with NCAA staff, the applicable sport/rules committee, other sport governing bodies, and/or outside experts, to conduct an individual inquiry as to whether the requested modification or accommodation can be made. In making this assessment, the NCAA may request additional information from the member institution. The secretary-rules editor will communicate the decision in writing (which may be via email) to the requesting member institution. If the request is granted, the member institution should be prepared to provide the written decision to the officiating staff, opposing coach(es), and tournament director (if applicable) for each competition in which the student-athlete will participate. NCAA members are directed to consult Guideline 2P of the NCAA Sports Medicine Handbook for further considerations regarding participation by student-athletes with impairment.
