Where Do NCAA Division I High School Recruits Come From?

- Baseball
- Men’s Basketball
- Football
- Men’s Soccer
- Men’s Track and Field
- Wrestling
- Women’s Basketball
- Women’s Soccer
- Softball
- Women’s Track and Field
- Women’s Volleyball
Notes: Percent derived from the number of DI MBA recruits from 2013-2016 divided by the number of boys baseball participants per state in 2015-16 as reported by the National Federation of State High School Associations. Alaska (0.8%) not pictured. No high school data are available for MT, ND, SD or WY.
Percentage of High School Boys Basketball Players Recruited by a Division I School

Notes: Percent derived from the number of DI MBB recruits from 2013-2016 divided by the number of boys basketball participants per state in 2015-16 as reported by the National Federation of State High School Associations. Alaska (0.3%) and Hawaii (0.4%) not pictured.
Notes: Percent derived from the number of DI MFB recruits from 2013-2016 divided by the number of boys football participants per state in 2015-16 as reported by the National Federation of State High School Associations. Alaska (1.2%) not pictured.
Notes: Percent derived from the number of DI MSO recruits from 2013-2016 divided by the number of boys soccer participants per state in 2015-16 as reported by the National Federation of State High School Associations. AK (0.5%) and HI (1.1%) not pictured; WY and SD had no DI recruits during that time.
Notes: Percent derived from the number of DI MTO recruits from 2013-2016 divided by the number of boys track and field participants per state in 2015-16 as reported by the National Federation of State High School Associations. AK (1.0%) and HI (0.8%) not pictured. DC and VT not included (number of HS participants <1,000).
Notes: Percent derived from the number of DI MWR recruits from 2013-2016 divided by the number of boys wrestling participants per state in 2015-16 as reported by the National Federation of State High School Associations. AK (0.5%) and HI (0.9%) not pictured. No high school data for MS. VT not pictured (number of HS participants <200).
Notes: Percent derived from the number of DI WBB recruits from 2013-2016 divided by the number of girls basketball participants per state in 2015-16 as reported by the National Federation of State High School Associations. Alaska (0.6%) and Hawaii (1.5%) not pictured.
Notes: Percent derived from the number of DI WSO recruits from 2013-2016 divided by the number of girls soccer participants per state in 2015-16 as reported by the National Federation of State High School Associations. Alaska (1.7%) not pictured.
Notes: Percent derived from the number of DI WSB recruits from 2013-2016 divided by the number of girls softball participants per state in 2015-16 as reported by the National Federation of State High School Associations. AK (1.4%) not pictured. No high school data are available for SD or WY. DC not included (number of HS participants <500).
Notes: Percent derived from the number of DI WTO recruits from 2013-2016 divided by the number of girls track and field participants per state in 2015-16 as reported by the National Federation of State High School Associations. AK, DC and VT not included (number of high school participants <1,000).
Notes: Percent derived from the number of DI WVB recruits from 2013-2016 divided by the number of girls volleyball participants per state in 2015-16 as reported by the National Federation of State High School Associations. AK (0.2%) not pictured. No high school data are available for VT.
