STEPS TO CALCULATE 2-4 TRANSFER GPA

2-4 Transfer GPA = total quality points for credits that could transfer/total credits that could transfer

Step 1. Add all credits that transferred from all two-year colleges attended.

Step 2. Add in any credits that would have transferred but did not due to an insufficient grade: (e.g., failed or “D” grade courses that would have otherwise transferred).

Step 3. Subtract physical education activity credits that exceed the two-credit limit.

Keep in Mind

- For repeated classes, use grade from most recent attempt.
- Ignore any institutional credit caps in this calculation.
- NCAA 2-4 transfer GPA may be different than the school’s 2-4 GPA calculation.

4-2-4 Transfers

Only use credits earned from the two-year college after student-athlete transfers from the initial four-year institution to calculate the 2-4 transfer GPA.

See NCAA Bylaw 14.5.4.6.3.2 for more information and exact language.
