

Medical Personnel

NCAA event certification legislation states:

- Qualified medical personnel must be present at the event;

The intent of this legislation is to insure that someone is available to tend to participating prospective student-athletes in case of emergency. The term "medical personnel" is intentionally broad, but at minimum, the individual should be trained to respond quickly to emergency situations regarding medical issues, traumatic injuries and accident scenes, be able to administer CPR and utilize a defibrillator. In order to meet the intent of this piece of legislation, **it is necessary to have qualified medical personnel AT EACH FACILITY** being utilized.
